

Crisis in the Black Community & Disparities in Chronic Diseases

Cancer

It is being reported that **63,500 African Americans** will die from cancer this year. Breast cancer is the second leading cause of cancer death among African American women, exceeded only by lung cancer. African American men have far higher death rates from prostate cancer than any other racial or ethnic group. *African Americans with cancer have a shorter survival rate than whites in all stages of diagnoses.

Diabetes

Black people with diabetes experience kidney failure about four times more often than diabetetic white Americans * **The death rate of Black Americans with diabetes is 40% higher than other races and cultures.**

High Blood Pressure

80% of all Black people over the age of 45 have high blood pressure, "The silent killer". African American clinics claim High Blood Pressure is a major killer of minorities in particular. * Some contributing factors are: Stress, poor diet, alcohol and drugs are considered the major causes.

Heart Disease

*Compared with any other group, African American women are more likely to get heart disease and die from complications.

Strokes

African Americans have twice as many strokes as white Americans. Inner city alternative health practitioners and the CDC claim African Americans have three times as much high blood pressure, diabetes, cancer, and heart disease.

Testimonies

NeoLife GMO Free Whole Food Products

The enclosed information is submitted by people who have actually used GNLD/NeoLife products. However, neither GNLD/NeoLife nor any Distributors make any medical claims as to cures or etc., except for the purity and consistency of the products that many people use to fill the nutritional gaps in their diet.

Given the existence of disparities in the delivery of the current health system many people are seeking ways to combat GMO's and chemicals in their environment to help their body to be healthier. From making different food choices to supplementing their diet is a choice some of these people are making.

My Testimony: Being diagnosed with stage four cancer my red blood count hovered between four & five I had very little energy. Because I felt that Chemo would further compromise my immune system I decided to forego Chemo and concentrate on rebuilding my own immunity. Although, I was warned that this was a risky proposition I discussed with the doctors that I had decided to use PhytoDefense, Tre-en-en, Protein Drink, Aloe Vera Plus, Vitamins C, B & E, Iron,

and Garlic Allium. That was Seven Years ago and I still use all of the products and have added a few more! I changed my diet, drank plenty of water and shut fear down! I believed in the products and fed my faith and starved my doubts. (J. Clark)

. *Making different food choices to supplementing their diet are choices some of people are choosing*

“Wellness is how we FEEL ...Healthy is how we LIVE”

PhytoDefense our #1 Cancer fighter and other products I used and still use. Tre-en-en helps nutrients to get into the cells (very important)

Tre-en-en helps nutrients to get into the

cells

Formula IV Plus a GMO Free Whole Food Product

Some ingredients of Formula IV Plus without Iron or Formula IV with Iron

Vitamin A: Promotes skeletal growth, normal tooth structure, healthy mucous membranes, healthy skin, eyes and hair; essential for night vision.

Vitamin D: Promotes bone and tooth development and normal growth, aids utilization of phosphorus and calcium, maintains nervous system and heart action; prevents rickets.

Vitamin E: Protects body's store of vitamin A, tissues and fat from destructive oxidation and breakdown of red corpuscles; strengthens capillary walls, regulates menstrual cycle, prevents loss of other vitamins, aids blood flow to heart, lowers blood cholesterol and fatty acids; vital to cell health; regulates protein and calcium metabolism.

Vitamin C: Essential to the formation of collagen; needed for absorption of iron, some proteins and folic acid, prevents oxidation of other vitamins, aids in metabolism of amino acids and calcium, stops internal bleeding; strengthens blood vessels, maintains hard bones and teeth; promotes stamina, holds body cells together; prevents infections, colds, fatigue and stress; reduces allergies; heals wounds and burns.

Folic Acid: Essential for function of Vitamins A ,D, E, and K; forms red blood cells and nucleic; improves circulation, aids digestion of proteins.

Vitamin B-1: (Thiamine): Helps to convert sugar and starches into energy; promotes digestion, strong heart muscles, child growth, prevents fatigue, fat deposit in arteries.

Vitamin B-2 (Riboflavin): Aids in releasing energy to body cells; enables utilization of fats, protein and sugars

Niacin: Aids normal functioning of tissues, particularly skin, gastrointestinal tract, and nervous system; used with other vitamins in converting carbohydrates to energy

Vitamin B-6: Aids metabolism of protein, carbohydrates and fats, controls cholesterol level; aids chemical balance between blood and tissue; prevents water retention, builds hemoglobin.

Vitamin B-12: Promotes utilization of protein, carbohydrates, essential for the formation of red blood cells, builds nucleic acid, prevents pernicious anemia, helps nervous system.

Vitamin B-5 (Pantothenic Acid): Keeps skin healthy, prevents wrinkles; stimulates adrenal glands; form nerve regulating substances; aids metabolism of fats, protein and carbohydrates, aids in resisting infection; aids proper sugar level balance.

Iodine: Aids thyroid gland and prevent goiter; helps burn fat; converts carotene into Vitamin; aids absorption of carbohydrates from small intestine; promote growth; regulates energy production; maintain hair, nails, skin and teeth.

Iron: Present in all cells; one of the constituents of hemoglobin which carries O₂ to the tissues by blood circulation.

irts At

The Cellular Level - When our cells are sick so are we. WE MOST FEEL, RENEW & PROTECT OUR CELLS

The American Cancer Society and the American Diabetic Association recommend eating 5-9 servings of fresh fruits and vegetables every day? What are you choosing? Are you open to using supplements to fill the gaps in your diet? Choose GNLD/Neolife products and get the protection you deserve!

SOME BENEFITS OF TRÉ

Science has shown that a special group of nutrients called polyphenols, drawn from an equally special group of foods referred to as Super Fruits, plays a wide range of critical roles in supporting and maintaining optimal health, longevity, and cognitive capacity throughout life. This research tells us that when these polyphenols are absent from or deficient in our diets, aging processes are accelerated and disease risk is higher. Conversely, when they are abundant in the diet, aging is slowed and disease is lowered.

- Boost energy
- Improve digestion functions
- Improve mental clarity
- Promotes sound sleep
- Enhance breast and prostate health
- Promotes eye health
- Provide high levels of fiber
- Cleanse the body of infections and toxins
- Strengthen your immune system
- Enhances sexual desire and performance
- Fights cancerous cells
- Slows down aging process
- Promotes healthier and younger skin
- Promotes urinary tract health
- Normalizes and regulates cholesterol levels
- Help to maintain healthy heart functions
- Minimizes inflammation
- Promotes weight loss
- Normalizes and regulates blood pressure levels

O Invigorating Liquid Nutritional Supplement is GMO free and contains:

Pomegranate, Acai Berry, Green Tea, Resveratrol, plus other super health enhancing ingredients that helps to promote optimal health.

I am so happy that I opened that door to NeoLife opportunity. My bills are paid.

NeoLife Phoenix Rising

Attorney Jonell Clark, World Team Director

Our Vision-Our Mission –Our Values

Our Vision- To work together to develop a team united to inspire hope, to enjoy wellness possibilities and a financial opportunity for all of our team members

Our Mission- To unite team members as a working group to improve the quality and quantity of life for the people in our neighborhoods

Our Values and Approach

Our Values- To ensure that “Empowerment” is more than a cliché as we promote self-reliance among our team members and the people we serve. We intend to work to increase our capacity to share positive lifetime events in their lives

Individual Initiative- We believe that each individual should assume a primary role in defining their most important challenges and to transform themselves by their efforts

Collaboration-We encourage partnerships among the diverse elements of our society-including individuals, organizations, businesses, educational and religious institutions

Comprehensive- We recognize -that the challenges we face are complex and interrelated hence, we must address our challenges holistically and simultaneously, by engaging various parties in a coordinated fashion

Prevention-We seek to identify and attack those fundamental conditions and behaviors that give rise to poverty, poor health, hopelessness and despair, rather than be consumed with treating their symptoms. We therefore will focus not only on helping individuals, but on changing people’s lives.
